## **Spokane County Head Start/ECEAP/EHS** Community Colleges HEALTH CONCERN

## **Health Guidelines for Head Start/ECEAP/EHS**

Head Start/Early Head Start mandates that all enrolled children have sensory screening, HCT and growth assessment within 45 days of enrollment, and based on the EPSDT guidelines. EPSDT recommends that objective hearing screening be done for newborns and annually for the 3-5y/o preschool children. These same guidelines recommend that an objective vision screening be done at age 3.

To meet this mandate, the Head Start/Early Head Start program screens with Audiometry or Otoacoustic Emissions, Snellen HOTV, Sure Sight or Photoscreening. If a child does not pass the programmed protocol for this age group or if staff are unable to obtain a screening we refer to the child's medical home for assessment and medical guidance on what the parent should do to meet the needs of their child.
