COMMUNITY COLLEGE RELATIONS

23 September, 2005

Dr. Karin Hilgersom,
Dean of Instruction for Arts and Sciences
Spokane Community College, MS 2011
1810 Greene St.
Spokane, WA 99217-5399

Dear Karin,

Over the past few years we have worked with your faculty and leaders at SCC and have seen development of excellent offerings in biotechnology. We have reviewed the syllabi, texts, and examinations of the following courses with an eye to accepting them as transferable to our programs. In our opinion, the equivalencies will stand to scrutiny regarding content, breadth of subject matter, extent of laboratory experience, and being thorough. We will accept the following, additional course transfers:

<u>Spokane Community College</u>		=	<u>Eastern Washington University</u>
BIOTC 233 Genetics	(5 cr)	=	BIOL 310 Fundamentals of Genetics (5cr)
BIOTC 120 Cell Culture	(5cr) plus		
BIOTC 261 Fermentation	(3cr)	=	BIOL 485 Molecular Biotechnology (5cr)
BIOTC 110 Scientific Investigation	(5cr)	=	BIOL 270 Biological Investigation (3cr)

Please let me know if this information may be added to your transfer guides as it has been to ours. If there are additional biology courses which you think we should review for the possibility of transfer credit, please let me know. Wishing you and your colleagues all the best.

Sincerely,

Dr. Flash Gibson, Head
Department of Biology
